ANNUAL REPORT
2014-2015
CHAIRMAN’S MESSAGE

Thank you all! It has been my honor and pleasure to serve as chair of the River Valley Regional Commission Council from January 26, 2011 through June 30, 2015. Your confidence and support in me has been overwhelming. It goes without saying that I could not have served as effectively without Vice Chair Clinton Perry of Taylor County, Secretary Richard Morris of Quitman County, the Executive Committee members and, of course, all of the Council members.

I look forward to my continued service as a Council member. I know the Council is in good hands as Clinton Perry takes over as chair, Richard Morris as vice chair and Mike Speight as secretary. All of these gentlemen are leaders in their respective communities, the region and the state. The best is yet to come!

Reduced federal funding affected all agencies, however, the RVRC region did prosper. The cities and counties receiving Community Development Block Grant (CDBG) funds during fiscal year 2015 with assistance from the RVRC staff included the counties of Talbot and Clay and the cities of Shellman, Richland, Unadilla, and Buena Vista. These projects include public facility improvements as well as housing rehabilitation. Several other communities throughout the region were also awarded CDBGs; each of these projects will improve the quality of life for residents throughout the River Valley region.

The 2010 Transportation Investment Act or T-SPLOST completed its second full year of tax collections. The widening of US Highway 27 and bridge replacement in Randolph County continued. Construction cost is estimated at $32 million. The first of the band one projects nearing completion is located in Talbot County with improvements being made to Pobiddy Road at an estimated cost of $3 million. The other band one projects located in Columbus/Muscogee County, Dooly County, and Sumter County will be under construction by the close of 2015. Many of the band two projects are in the design phase. Through June of 2015, $112,217,484 had been collected in the region with $28,054,371 being directly distributed to our region’s local governments for transportation purposes. This is quite an accomplishment as our region was one of only three in the state to vote for the tax. These projects will continue to propel our communities to grow and prosper during its implementation.

The Council is happy to report that the Columbus office is relocating to a new facility on Front Avenue in uptown Columbus. The present building is under contract and a much larger facility has been purchased through the issuance of bonds by the Downtown Development Authority of Columbus. Part of the new space will be leased to ColumbusMakesIt, a recently established non-profit that will provide a “makerspace” or community center for diverse artists, makers, and technologists. ColumbusMakesIt will provide the tools, education and support that will encourage and inspire people to Learn It, Make It and Live It. Necessary construction/renovation is underway, and the Council and the staff are extremely happy. We anticipate moving into the new facility in November of this year.

The RVRC, in FY 2015, brought in approximately $19,747,659 to the 16-county region; this means that for every $1 dollar of dues received by the RVRC from our cities and counties, their overall return on investment was $52.23 in federal and state funding. Fifty-four percent (54%) of funding received this year was federal, and 46% percent was received from the state.

As always, the RVRC Council members and the staff are all willing to provide assistance to you in any way. Please feel free to contact our Executive Director Patti Cullen if you have any questions.

Terrell Hudson
The River Valley Regional Council, composed of representatives from our 16 counties and 35 cities, meets monthly to review and discuss activities of the RVRC. Individual committees have been formed within the council to discuss issues related to transportation, economic development, and planning. The committees meet as needed to review, discuss, and to make decisions on related projects, and report their findings back to the full Council.

**Regional Planning**
The River Valley Regional Plan presents a vision for the River Valley, identifies minimum standards for local governance and recommends minimum environmental protection measures needed to help achieve the vision. The implementation regulations granted a three-year grace period for compliance with the state’s new Regional Planning Standards. This year staff performed an inventory of all 51 jurisdictions to determine the current levels of compliance with recently established performance standards and protection measures. RVRC recommendations will help member governments come into compliance with any standards and/or measures not already adopted.

**Local Planning**
The state has established a set of Minimum Standards and Procedures for Local Comprehensive Planning for local government use in identifying and developing priorities for growth, management and resource protection. During this fiscal year staff assisted five counties as they progressed through plan development: Georgetown-Quitman County (adopted October 2014), Webster County (adopted October 2014), Marion County-Buena Vista (October 2015), Talbot County-Geneva-Junction City-Talbotton-Woodland (October 2015) and Chattahoochee County (February 2016).

**Pre-Disaster Mitigation**
Local pre-disaster mitigation plans are a requirement for eligibility for pre-disaster mitigation assistance and post-disaster recovery assistance. Pre-disaster mitigation planning is a process of identifying a community’s greatest disaster threats (e.g., tornadoes, extreme weather events) and determining how best to reduce exposure to those threats. The successful implementation of good plans should reduce injuries, deaths, and property losses caused by natural and man-made disasters. During the year Marion and Sumter counties’ plans were approved by the Federal Emergency Management Agency and subsequently adopted by the cities and counties. Plans for Dooly and Webster counties were scheduled to be approved in July 2015. Schley County’s plan is under review by the Georgia Emergency Management Agency. Talbot and Crisp County plans are being developed.

**Zoning**
Zoning helps preserve property values and provides local governments the tools to prepare for growth. The staff provided planning and zoning technical assistance to Chattahoochee, Quitman, Stewart, and Talbot counties and the cities of Fort Gaines, Hamilton and Richland. This allows these local governments to utilize their zoning ordinances and to make the most informed and educated decisions possible. This year staff reviewed four variance requests, four zoning requests, and two conditional use requests. Staff continued working with the Schley County zoning committee to develop the county’s first zoning ordinance.

**Environmental Planning**
The Pennathecchee Creek project, which was designed to help reduce levels of fecal coliform, has been completed. More than 620 feral hogs were captured and approximately 32,000 linear feet of fencing was installed to prevent livestock from entering the waterways. Through this project, RVRC mitigated 5,500 square feet of heavy-use area by installing seven alternate watering troughs and three stream crossings to reduce sediment and pollutant transport. As part of the project, RVRC partnered with the University of Georgia to produce the state’s first Landowner’s Guide for Wild Pig Management. The project’s originality and successful implementation earned the RVRC an Innovation Award from the National Association of Development Organizations.

In April 2015, RVRC received a $440,848 Georgia Environmental Protection Division grant for a project to reduce the threats of high fecal coliform counts and sediment loads for Pataula Creek in Clay, Quitman, Randolph, and Stewart counties. The project will consist of bacterial and chemical monitoring as well as DNA source tracking. Best management practices will be used along dirt roads and forestry operations in order to reduce sediment displacement. Two composting facilities will be installed to help reduce fecal coliform levels from deer carcass dumping.
RVRC is currently working on a Watershed Improvement Plan for the Kinchafoonee Creek Watershed in Webster and Marion counties. The watershed, which includes Clear Creek and Lanahassee Creek, is not in violation of any pollutants; the plan is being written to continue a healthy watershed initiative and will be used as a model to demonstrate “What to do to keep a clean and healthy watershed.”

**Historic Preservation**
The Historic Preservation Planner provides assistance to people interested in restoring historic properties and to historic organizations that promote preservation throughout the region. This year staff reviewed 58 applications for Certificates of Appropriateness for the Board of Historic and Architectural Review for the City of Columbus. Additionally, staff completed historic preservation reviews for 11 applications requesting grant funding for various regional communities. During the course of the year staff also provided:

- assistance with National Register nominations and grant applications for Big Poplar Springs Baptist Church (Dooly County) and the Vienna Historic Society
- a presentation to the Randolph County Rotary Club and the Randolph County Historic Society regarding the benefits of historic preservation, historical preservation tax credits, and the Main Street Program
- information on HP tax credits to the Cordele Main Street Program
- technical information regarding window repair/replacement to the Dooly County Board of Commissioners
- technical assistance in Richland for rehabilitation of two downtown buildings and in Vienna for rehabilitation of one downtown building
- information regarding historic preservation to the Marion County Tourism Resource Team
- technical assistance to the Stewart County Historical Society regarding rehabilitation of the old Lumpkin jail
- technical assistance regarding historical markers in the eight western counties of the region, attempting to get them on the Georgia Department of Transportation inventory of markers.

**Geographic Information Systems**
The Geographic Information System (GIS) department serves as a depository for mapping information within the region. Staff worked with Randolph County Chamber of Commerce on a Historic Homes and Sites Tour Map. Staff analyzed the tax delinquency data for Crisp County. The GIS staff continues to maintain tax parcel data for Crisp, Macon, Marion, Quitman, Randolph, and Webster counties.
**Transportation Planning**

**Transit Activities**
The Lower Chattahoochee Regional Transportation Authority (Quitman, Randolph, and Stewart counties) was created by the state legislature to operate the Pataula Transit System. RVRC staff administers the program and Resource Management Systems, Inc. operates the system, which is based in Springvale (Randolph County). Transit is used to support seniors, jobs, and other endeavors.

Staff continues to work with the Department of Human Services (DHS) on coordinated transportation efforts for the 16-county region. In FY15, 75,132 trips were made in the region and 1,195 four-week bus passes were distributed in Muscogee County. Of these trips, 47,949 were to and from 11 of the region’s senior centers and served 2,577 people.

During FY15, RVRC implemented TRIP$, the new statewide online trip ordering and billing system. Staff received a letter of accommodation from DHS for being the quickest region to successfully implement the system. RVRC’s DHS program received an award from the National Association of Development Organizations.

**Safe Routes to School**
Staff worked with Schley County Elementary School to complete a Safe Routes to School Plan, which contains detailed assessments of transportation needs within a 2-mile radius from the school. The plan provides ideas for safety-related activities and recommendations for how to encourage more children to walk and bike to school. Twelve (12) schools in the region have Safe Routes to School plans. Staff continues to support the Georgia Safe Routes to School Resource Center by scheduling site visits, renewing partnership forms and participating in Walk-to-School Day events.

**Job Access and Reverse Commute (JARC) Mobility Management Program**
The Mobility Manager works with entities in each county to discuss transit options, cost efficiencies, and economic development support. The Mobility Manager also provides guidance and expertise for the three-county Lower Chattahoochee Transportation Authority (Quitman, Randolph, and Stewart).

A regional inventory of transit services and providers was conducted in order to determine individual system needs, service gaps, and existing levels of coordination. From the inventory, a regional directory was developed to facilitate service access.

**Transportation Enhancement (TE)**
This program enables funding for transportation projects of cultural, aesthetic, historic and environmental significance. Staff assisted the following communities with implementing different phases of their TE projects:
- City of Shellman - streetscape project
- City of Andersonville - depot renovation
- City of Cordele - sidewalk improvements

**Teens in the Driver Seat**
Teens in the Driver Seat is a new program being presented in the River Valley region through our partnership with the Georgia Department of Transportation. This is a nationwide program administered through Texas A&M Transportation Institute. It is a peer-to-peer program for teens that focuses on traffic safety and addresses the major risks for teen drivers. Five schools in the region expressed an interest in participating in the program during the 2014-2015 school year. Staff will continue to introduce this program to other schools in the region during the 2015-2016 school year.

**Bicycle and Pedestrian Planning**
RVRC staff plan and implement programs and events that promote cycling and walking as healthy, safe forms of transportation and recreation. The staff serves as technical advisors to the boards of Bicycle Columbus, Sumter Cycling, Safe Kids, and the Chattahoochee Valley Area Southern Off-Road Bicycle Association. RVRC staff serves as a partner on the Friends of the Greenway Trail Fund which is led by the Community Foundation of Chattahoochee Valley in partner-
170 people participated in Bike to Work Day events in Americus and Columbus

115 people participated in the Georgia Bike Summit

110 people participated in the Lumpkin Fair on the Square Bicycle Ride

80 people participated in the MidTown Bike Around events

74 people participated in the Prison to Peanuts Bicycle Adventure

48 people participated in Tour de Farm

Tour de Farm cyclists prepare to head out on the road again after a stop at a farm in Schley County.

RVRC staff received an Excellence in Regional Transportation award from the National Association of Development Organizations for marketing Tour de Farm as a means to promote agri-tourism in the region.
The Community & Economic Development Department provides grant writing, grant administration, and technical assistance to our region’s local governments. The RVRC is designated as an Economic Development District which allows us to receive funding in order to provide technical assistance to cities and counties, development authorities, and existing and emerging private entrepreneurs, businesses, and industries.

**Community Development Block Grant (CDBG)**

In April 2014 staff prepared 15 CDBG applications. The following were approved for funding in September 2014:

- City of Buena Vista – $491,920, water system improvements
- Clay County – $471,623, water system improvements
- City of Richland – $500,000, sewer system improvements
- City of Shellman – $500,000, sewer system improvements
- Talbot County – $575,175, multi-activity program including street and drainage improvements, home rehabilitation and reconstruction
- City of Unadilla – $500,000, sewer system improvements

On April 1, 2015, RVRC staff submitted 17 applications for various communities for the FY15 CDBG funding cycle.

**Development Projects**

Quarterly meetings provided opportunities for networking and learning tools for promoting and growing local downtown areas. Staff coordinated these meetings through the Economic Development Administration’s planning grant. Sessions on tourism resources and crowdfunding were held in Shellman and Georgetown.

**Rehabilitation Projects**

The City of Richland and the City of Vienna have downtown redevelopment projects under construction. These projects are funded through the Redevelopment Fund Grant, a set aside of CDBG funds.

**Revolving Loan Fund (RLF)**

An RLF luncheon to market the loan programs was held in September 2014 in Cordele with good attendance from local bankers. This has become a yearly event with the meeting location rotating throughout the region. RVRC staff continues to market the program and review possible projects for funding.

**Comprehensive Economic Development Strategy (CEDS)**

Staff completed the annual update to the CEDS which was approved by the Economic Development Administration. The CEDS Committee continues to promote dual enrollment in area high schools. In addition the committee worked with the REACH GA program to provide information on this post-secondary education program to area school superintendents. As a result, two additional school dis-
tricts in the region enrolled in the program and two additional districts are working on applications for 2016.

**DIGITAL ECONOMY**
The Digital Economy Plan for the River Valley region was completed in winter 2014. The plan identified regional strengths such as the types of businesses that are in the region, the types of places people want to work, and the infrastructure to support a Digital Economy. Infrastructure investments continue to be needed in the region. Overall there is broad awareness of the importance of understanding and transitioning to a Digital Economy, and a recognition that training at all levels is needed throughout the region.

Suggestions, goals, actions, costs and responsible parties were developed as a part of the planning process. These goals and actions were divided based on location in the region, with suggestions targeted to the needs in the local community. Columbus has a different set of needs based on the types and strengths of the businesses compared to the other places in the region. Highlights of these goals include increasing wireless capabilities throughout the region, developing and building local small business and government capacity for effective use of digital tools and resources, focusing on the attraction and retention of top engineering talent, and encouraging entrepreneurial activity through the development of a makerspace in Columbus.

- $3 million received in CDBG funding
- $50,000 Immediate Threat & Danger grant to the City of Richland for sewer treatment plant repairs
- $35,623 Immediate Threat & Danger grant to the City of Byromville for water filtration system repairs
- $16,500 USDA Search grant to the City of Marshallville to evaluate infrastructure needs
- $25,000 USDA Community Facilities grant to Stewart County to purchase a utility vehicle
- $17,208 USDA Community Facilities grant to the City of Butler to assist in the purchase of a police car
- 2,421 people benefitted from six closed CDBG projects: 4 sewer system improvements, 1 water system improvement, 1 roadway and drainage project, 3 homes rehabilitated, 1 mobile home unit reconstructed
WORKFORCE INVESTMENT

The River Valley Regional Commission serves as the grant recipient and administrative entity for the local area Workforce Investment Act (WIA) services. These services are governed by the Middle Flint Workforce Investment Board (MFWIB), which is comprised of local private and public sector members. The local WIA serves the eight counties of Crisp, Dooly, Macon, Marion, Schley, Sumter, Taylor and Webster. WIA offers educational and training opportunities to assist and enhance employment opportunities that will lead to employment, job retention and individual self-sufficiency for eligible individuals age 17 and up.

WIA grant awards designated for the area during Program Year (PY) 2014 and Fiscal Year (FY) 2015 totaled $1,238,402. The WIA and Trade Act programs served 315 people during this time period. Based on local performance, the River Valley WIA program has been classified as exceeding the nine WIA performance measures.

On-The-Job Training (OJT) assists employers in finding skilled employees who meet their employment needs. Employers work with an OJT career advisor to outline required work duties, qualifications, and to determine the length of training time needed to master job tasks. The employer interviews WIA participants and makes the final hiring decision. The OJT participant is paid wages by the employer during the designated training period. The employer is eligible to receive a reimbursement for the training and permanent employment of the OJT participant. Reimbursements to OJT participating employers total $28,576. Employers participating with the OJT activity included Crisp Youth Detention Center (Crisp), and Tyson Foods (Dooly). OJT enrollments: 29

GED Plus Training Services assist WIA-eligible participants in obtaining their General Education Diploma (GED) by offering basic skills remediation. GED remediation training provides an instructor-led review of the subject areas of the GED training materials. Work readiness training is the “Plus” portion of the program and focuses on resume’ preparation, job search techniques, interviewing skills, career exploration, work ethics, personal budgeting and finances, youth work experience, dressing for success, job search assistance, post-secondary educational exploration and workplace skills. Participants attend instructor-led classroom training for six weeks. Classes meet Monday thru Friday for six to eight hours daily. GED examinations fees and supportive services benefits are available to assist with the training cost. GED Plus enrollment: 166

- 166 people enrolled in GED Plus
- 113 people served by Individual Training Accounts
- 80 businesses and employers benefitted from WIA services
- 29 people received On-the-Job training services
- 16 people participated in the Youth Work Experience
- 6 people received Trade Act services
- 130 Credentials attained by WIA participants
  - 40 GEDs
  - 37 state licenses
  - 34 associate degrees
  - 10 diplomas (technical college)
  - 8 commercial drivers licenses
  - 1 bachelor’s degree
Youth Work Experience Services enhance employment opportunities for youth participants who recently obtained their GED and have little or no work experience. Youth are paid $7.25 per hour during the Work Experience activity. Employers who participated as worksites include Mercy Housing (Sumter), Sumter County Board of Commissioners, Habitat for Humanity (Sumter), Dorothea’s Beauty Salon (Sumter), and Crisp County Public Library. **Youth Work Experience enrollment: 16**

Trade Act Training Services provide benefits and training opportunities for workers whose jobs have been affected by trade with foreign nations or whose jobs have been moved outside the United States. Businesses or employers must file a federal Trade Act Petition specifying the reason for business closures or reductions in workforce. Laid-off employees (dislocated workers) receive benefits such as educational training opportunities, extended Unemployment Insurance Benefits, relocation assistance, occupational training, etc. to laid off employees. **Trade Act Services enrollment: 6**

**INDIVIDUAL TRAINING ACCOUNTS (ITA)** provide educational and/or occupational skills training to enhance employability. This training activity typically includes both classroom training and hands-on learning for specific educational and/or occupational related areas. Georgia has an Eligible Provider List (EPL) from which individuals can choose eligible training providers which provide the desired type of ITA training services. Technical colleges, public colleges and universities as well as private training providers are typically the location for the ITA training services. Darton College (Cordele Campus), South Georgia Technical College and Georgia Southwestern State University are three ITA-eligible training providers located within the area. ITA participants receive assistance with fees for tuition, books, training supplies, and transportation costs while in training. **ITA enrollments: 113**

**EMPLOYMENT RATE** for people enrolled in WIA programs as of the 3rd Quarter (June 2015) and their average earnings for six months:

The mission of the Area Agency on Aging is to create and sustain a livable community that promotes health and well-being for older adults and persons with disabilities. Our vision is to “Be Informed, Be Prepared and Live Well.”

**AGING AND DISABILITY RESOURCE CONNECTION (ADRC)** is the portal for seniors, caregivers and people with disabilities to obtain information as well as placement for appropriate services and resources. Access to these services provides opportunities for the elderly and disabled to maintain independence and dignity through a comprehensive, coordinated system of resources and support. Our database includes more than 300 service categories. Counselors discussed options with more than 4,500 callers seeking information.

**HOME-DELIVERED AND SENIOR CENTER MEALS** are available through our subcontractors that serve meals in 12 senior centers and deliver meals to homes. More than 212,013 meals were served to seniors over 60 years of age, their caregivers, and persons with disabilities. We subcontract with 12 senior centers in our region which offer a variety of recreational opportunities such as exercise, games and arts and crafts in addition to congregate meals.

**COMMUNITY CARE SERVICES PROGRAM (CCSP)** is a Medicaid waiver service for those needing extensive care at home to prevent nursing home admission. The program saves Medicaid dollars and allows the clients to remain in their own home and community. The average time a consumer receives services under the CCSP waiver is 48 months. The average Medicaid cost for nursing home care is $31,368 per person. The average Medicaid service benefits cost per CCSP consumer for the same period is $9,031. This is a potential savings of approximately $22,337 per consumer or about 71% less than traditional costs of nursing home services. Also, 44% of CCSP recipients pay a cost share based on their income.

**WELLNESS AND PREVENTION** staff provided presentations and programs on safety, nutrition, physical activity and exercise, osteoporosis screening and disease management for 7,724 seniors. The AAA partnered with the public health department for the 10th year in offering osteoporosis screenings. These screenings were completed at Randolph and Muscogee County senior centers. The wellness program is also coaching senior center managers on how to promote healthy lifestyles by providing current health-related information and daily physical activity with their participants.
**Case Management** provides assistance to clients on the Home and Community Based Services (HCBS) waiting list who have little or no caregiver support and are not able to receive Home and Community Based Services immediately. Other resources are identified and a care action plan is developed to help meet the client’s needs. Case management services were provided for 70 clients. The Telephone Reassurance Program “Heart to Heart” provided 1,275 support calls for clients on HCBS waiting lists, using volunteers who are also waiting-list clients. The AAA continues to partner with the Georgia Chapter of the Alzheimer’s Association to extend the Telephone Reassurance Program to caregivers and clients with dementia. The Telephone Reassurance Program was offered in Muscogee, Harris, Talbot, Stewart, Randolph and Sumter counties.

**Caregiver Services** help keep caregivers healthy so they can continue providing care to their loved ones while taking care of themselves too. The Powerful Tools for Caregivers program offered one class with 12 people attending. This program provides caregivers with tools and strategies to help them handle caregiver challenges. The West Central Georgia CARE-NET grew significantly this year and continues to meet on a regular basis.

**Evidenced Based Wellness Programs**
- Chronic Disease Management Program teaches participants to live well with and manage their chronic condition. One lay-leader training was conducted with **nine** lay leaders trained. **Three** community classes were conducted in Randolph and Muscogee counties.
- Matter of Balance is an interactive fall prevention program which teaches participants to cope with the fear of falling. This eight-session program was offered in Randolph and Taylor counties.
- Tai Chi is an exercise program improving balance and strength for seniors and those with arthritis. This program was taught in Muscogee and Harris counties.

**Senior Farmers’ Market Nutrition Program** served **632** seniors at 12 senior centers and one subsidized apartment complex. This is the eighth consecutive year the AAA was able to provide this service. Each senior was able to cash in a $20 voucher in exchange for fresh produce from a local Georgia farmer on site.
Area Agency on Aging

GeorgiaCares provides information about Medicare and other related insurances. The River Valley GeorgiaCares program attended 270 events and reached more than 160,000 beneficiaries this year. The River Valley GeorgiaCares program partners with the Department of Community Health to assist beneficiaries in obtaining Medicare Savings Programs, enrolling for Medicare Part D, the Senior Supplemental Nutrition Assistance Program, and Low Income Subsidy provided through Social Security. The Low Income Subsidy program saved beneficiaries $2,733,258. Applications were completed for 654 people for the Medicare Savings Program, which saved beneficiaries $104,708 in Medicare Part B premiums, coinsurance and other out-of-pocket costs. The River Valley GeorgiaCares program is also the designated Senior Medicare Patrol (SMP) investigating Medicare errors, fraud and abuse. Staff provided 189 SMP events and outreach activities.

Money Follows The Person (MFP)/Options Counseling assists residents who wish to return to their communities. The AAA options counselor visits with nursing home residents and works with nursing home staff to determine if further action should be taken based on the resident’s self-direction. If services are available and the resident wishes to leave the nursing home, the program known as “Money Follows the Person” is initiated. This program assists residents in resettling in the community with home and community services. Through a contract with RVRC, Access 2 Independence transitioned 17 people from nursing homes back into the community. The AAA options counselor provided counseling to 146 residents in the region’s 20 nursing homes.

Long Term Care Ombudsman program helps residents of nursing homes and personal care homes resolve problems with services and benefits to ensure their rights and standards of quality care are maintained. This program also provides older persons and their caregivers information regarding long-term care facilities. This program served 11,497 people.

Elderly Legal Assistance Program (ELAP) provides legal representation, legal information, and community education in civil legal matters. Twenty-four (24) community educational sessions were provided for 446 persons. This program served 128 clients and provided 1,186 counseling hours. ELAP also provided 1,430 people with information and referral services.
